

Our Ref: Q2 17 66

12 October 2017

- 1) *Has any forensic/psychiatric hospital or treatment/assessment centre within your trust adapted the HCR20 risk scoring tool to include criteria on radicalisation and/or extremism? If so, how has this adaptation been justified (given that the HCR20 is a normed and standardized tool in its original format)? And, from where were these additional criteria/questions on radicalisation and extremism drawn? If your trust has adapted the HCR20 to include criteria on radicalisation/extremism, please could you also send me a template.*

Somerset Partnership NHS Foundation Trust has not adapted the HCR20 risk scoring tool to include criteria on radicalisation and/or extremism?

- 2) *Is your Trust's Prevent policy a stand-alone or is it integrated into your safeguarding policies?*

Somerset Partnership NHS Foundation Trust's Prevent policy is integrated into its Safeguarding Adults at Risk Policy, a copy of which is available on the Trust's public website via the following link:

<http://www.sompar.nhs.uk/media/2258/safeguarding-adults-at-risk-policy-2015-v5aug-2015.pdf>

The Trust also has a stand-alone page on its internal website which is accessible to all staff.
