Risk Formulation Tool (Training Tool)

- **Nature**
  - Describe specifically:
  - Who is involved?
  - What might the motivation/reason be?

- **Severity**
  - How severe could it be?
  - What might the motivation/reason be?

- **Imminence**
  - How soon could it happen?
  - Are there warning signs?
  - Are there known triggers?
  - Are there identified protective factors?

- **Frequency**
  - How often might it occur and when?

- **Likelihood**
  - On balance how likely is it that this will happen?

---

**What next...?**

- [ ] Update Risk Screen
- [ ] Add formulation to progress note
- [ ] Update Careplan
- [ ] I will discuss with...

---
